Hi Steven, my colleague Jess is out but I can help.

I will renew and add an additional activation to each of the license keys you list. The additional activation is meant to replace

RStudio Server Pro License Key: 97FQ-3HTB-SMKV-8G9Z-AQKT-G2BF-N2TA
Shiny Server Pro License Key: KACJ-RPBJ-VSJ9-EZ87-PT7A-662W-FSTA

This way you have one license key for each product at Pomona. We can add additional activations to those licenses as your teaching needs grow.

In addition, I'd like to issue an RStudio Connect license key to you for 100 Named Users. We'd love to see RStudio Connect be part of your teaching infrastructure, replacing Shiny Server Pro. We're confident your teachers and students will like the simplicity of publishing shiny applications, ability to publish R Markdown documents, APIs, and more. If you would be willing to give it a try, that would be great! If it turns out to be a better solution for you than Shiny Server Pro, we can add additional named users to meet your teaching needs and deprecate your Shiny Server Pro licenses. If you end up preferring to stick with Shiny Server Pro, that's fine. We can then cancel the RStudio Connect license.

I hope that all makes sense. If you'll confirm that it's OK, I'll complete the renewals.

Best,
Roger
